RIGK agricultural systems driving the circular economy – 2024 results & 2025 campaigns

Dear Sir or Madam,

This summer brings not only record temperatures but also peak activity across RIGK's agricultural take-back systems – including ERDE, PAMIRA® and Verena. The encouraging results from 2024 and the ongoing campaigns this year clearly show: **the circular economy in agriculture continues to gain momentum.**

In this edition of the Agri Reporter, we present the **key results from the systems**, introduce **new ERDE members** and highlight the strong level of participation in the 2025 campaigns. Together, the sector and all participating stakeholders underline their commitment to resource conservation and sustainable solutions for the future.

Join us in continuing to take responsibility – shaping agriculture sustainably,

... because our actions today determine the world of tomorrow!

We hope you enjoy reading.

Markus Dambeck

Chairman of the management, RIGK GmbH

ERDE increases returns: almost 40,000 tonnes of agri-plastics in 2024

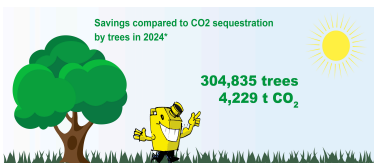

With new collection fractions such as greenhouse films and drip tapes and a continuously expanding network, ERDE is setting strong signals for circular economy in the agricultural sector.

Verena growing: over 360 tonnes of packaging returned

The young system collected and recycled more than 360 tonnes of agricultural big bags in 2024. The 2025 campaign is running successfully and now also includes paper and film packaging.

New ERDE members: MANTZARIS and EXPORPLÁS

MANTZARIS will now contribute to the collection of agricultural films.

EXPORPLÁS strengthens ERDE's focus on baler twine, bale nets and silage films.
